

Let eHealth manage your employee health benefits

Focus on your business, not workforce health benefits

Running a business keeps you busy, so let us help you and your employees simplify the shopping, enrollment and customer service needs of group health benefits. We offer an online self-service flow for individuals and groups looking to shop, quote, compare and enroll into health plans. We also have a team of licensed and experienced insurance agents and customer care representatives that can help them with their decision and offer ongoing support.

Get what you need online or over the phone

Get real time quotes online or speak with a licensed agent to shop & compare options and receive guidance on setting up benefits for your group. When you're ready to enroll, go at your own pace online, or get step-by-step assistance over the phone.

We're here to help

Our commitment doesn't end at enrollment. Our dedicated customer service teams provide both employee and employer support. We'll also help keep you up to date with any changes to your plan to ensure that you and your employees are happy with their benefits.
